

VEHICLE MANAGEMENT SYSTEM USING SALESFORCE

1 INTRODUCTION

1.1 Overview

Vehicle Management System is a windows application written for 32-bit Windows operating systems which focused in the area of adding, editing and deleting the passengers, staff and the bus routes. In this software a person can be register as a user and he can manage the bus routes and the staff, passengers' details. The Vehicle Management System (VMS) is an application for the Automotive industry. It supports, in the area of Sales & Services, the business processes that you require as vehicle importer when dealing with your original equipment manufacturers (OEMs) and your dealers in new and used vehicle sales .

To assist in the tracking of vehicles operation and the planning of maintenance that is important to avoid any damage/unexpected problem that might occur in the future that may cause hindrance to the operation and/or risking the safety of the drivers and passengers. An in-vehicle monitoring system (IVMS) describes electronic device that is used to track, assess and report on vehicle activity any which in turn reflects on the driver's behaviour. You can ensure that your company meets regulatory standards and full compliance through a quality management system.

These standards must be carefully followed which a quality management system can help you achieve. Performance and product issues can be discouraging to customers and a detriment to your brand. A good EV charging management system will monitor the charging process of all the vehicles in the system. It will also monitor real-time energy production, load balancing, local energy consumption, and electrical infrastructure capabilities.

The characteristics of management are:

- Goal-oriented.
- Pervasive.
- Multi-dimensional.
- Continuous process.
- Group activity.
- Dynamic function.
- Intangible force.

1.2 Purpose

Fleet (vehicle) management can include a range of functions, such as vehicle leasing and financing, vehicle maintenance, licensing and compliance, supply chain management, accident management and subrogation, vehicle telematics (tracking and diagnostics), driver management, speed management, fuel management, health .

Vehicle management system is an automated software for the transportation industry or an organization which owns a large number of vehicle & managing fleets. A DMS is a piece of software created to help car dealerships handle daily tasks like sales, finance, service, and parts. It offers reporting and analytical tools and aids dealerships in managing their inventory, clients, and sales processes.

A vehicle tracking system is a software system used by transport companies to monitor the location of trucks, trailers and other vehicles. The software is connected to the vehicles via GPS, giving companies real-time insight into the geographic position of their vehicles.

A transportation management system (TMS) is a logistics platform that uses technology to help businesses plan, execute, and optimize the physical movement of goods, both incoming and outgoing, and making sure the shipment is compliant, proper documentation is available.

Back to the basics: dealer management software is one easy-to-use system with a full suite of products and plugins. It helps integrate and manage sales, parts, service, finance, insurance, and warehouse inventory, creating a more efficient use of resources from staffing to features and services.

What is the full form of MMC vehicle

The Mitsubishi Motors Corporation group of companies comprises 182 subsidiaries, 32 affiliates and 2 other associates . The MMC group is engaged in the development, production and sales of automobiles (passenger cars, trucks and buses), parts for those automobiles, and industrial engines.

The SDM Maintenance Contracts Module allows users to record and monitor Maintenance Contracts from within the SDM Repairs & Maintenance module. The Contracts Module lists the properties that are part of that contract and allows you to monitor the actual cost and any variations to the contract.

10 Benefits of GPS Fleet Tracking

- Maximize Vehicle Utilization. ...
 - Reduce Insurance Costs. ...
 - Reduce Fuel Costs. ...
 - Reduce Fleet Maintenance Costs. ...
 - Improve Route Planning. ...
 - Improve Fleet Security. ...
 - Get Real-time Information. ...
 - Improve Time Management.

Click View Button Layout

Data type

None Selected Select one of the data types below.

Auto Number A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

Formula A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

Roll-Up Summary A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

Lookup Relationship Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

External Lookup Relationship Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

Checkbox Allows users to select a True (checked) or False (unchecked) value.

Currency Allows users to enter a dollar or other currency amount and automatically formats the field as a currency amount. This can be useful if you export data to Excel or another spreadsheet.

Date Allows users to enter a date or pick a date from a popup calendar.

Date/Time Allows users to enter a date and time, or pick a date from a popup calendar. When users click a date in the pop-up, that date and the current time are entered into the Date/Time field.

Email Allows users to enter an email address, which is validated to ensure proper format. If this field is specified for a contact or lead, users can choose the address when clicking Send an Email. Note that custom email addresses cannot be used for mass emails.

Geolocation Allows users to define locations. Includes latitude and longitude components, and can be used to calculate distance.

The screenshot shows the Salesforce Lightning Experience interface. The top navigation bar includes tabs for 'Profiles | Salesforce' and 'governmentartsandscienc542-dev-ed.develop.lightning.force.com/lightning/setup/EnhancedProfiles/page?address=%2F00e2w000005sfQ'. The left sidebar has sections for 'Setup Home', 'Service Setup Assistant', 'Multi-Factor Authentication Assistant', 'Release Updates', 'Lightning Experience Transition Assistant', 'Salesforce Mobile App', 'Lightning Usage', 'Optimizer', 'ADMINISTRATION', and 'Users' (with sub-options: 'Permission Set Groups', 'Permission Sets', 'Profiles', and 'Public Groups'). The main content area is titled 'SETUP Profiles' and displays the 'Analytics Cloud Integration User' profile. It shows the profile name, user license, creation details, and a list of permissions like 'Login IP Ranges', 'Enabled Apex Class Access', etc. Below this is a 'Profile Detail' section with tabs for 'Edit', 'Clone', and 'View Users'. The 'Page Layouts' section lists standard object layouts for various objects like Global, Email Application, Home Page Layout, Account, Object Milestone, Operating Hours, Opportunity, and Opportunity Product. The bottom status bar shows the URL 'https://governmentartsandscienc542-dev-ed.develop.my.salesforce.com/one/onc/app#/alohaRedirect%00e2w000005sfQ?sdtp=p1', system icons, and a search bar.

The screenshot shows the Salesforce Lightning Experience setup interface. The top navigation bar includes links for 'Profiles | Salesforce', 'Setup', 'Home', and 'Object Manager'. A search bar at the top right says 'Search Setup'. On the left, a sidebar lists various setup categories: 'Setup Home', 'Service Setup Assistant', 'Multi-Factor Authentication Assistant', 'Release Updates', 'Lightning Experience Transition Assistant', 'Salesforce Mobile App', 'Lightning Usage', 'Optimizer', 'ADMINISTRATION' (with sub-options 'Users', 'Permission Set Groups', 'Permission Sets', 'Profiles', 'Public Groups', and 'Queues'), and a 'Quick Find' bar.

The main content area is titled 'SETUP Profiles'. It features a 'Standard Object Permissions' section with a table showing access levels for various objects. The table has two main sections: 'Basic Access' and 'Data Administration'. The 'Basic Access' section includes columns for Read, Create, Edit, Delete, View All, and Modify All. The 'Data Administration' section includes columns for View All and Modify All. The table rows represent different objects: Accounts, AI Insight Reasons, AI Record Insights, Alternative Payment Methods, API Anomaly Event Stores, App Analytics Query Requests, Application Usage Assignments, Appointment Invitations, and Appointment Schedule Aggregates. Each row contains checkboxes for each permission level, with some checked (e.g., 'View All' for Accounts).

5 ADVANTAGES & DISADVANTAGES

Advantages

- Improve fleet safety and working conditions.
- Improve the behavior and performance of drivers and beat unsafe driving.
- Schedule shifts and work hours.
- Leverage driver retention.
- Track vehicles, assets or professional equipment (even trailers and containers)
- Schedule routine maintenance.
- Manage fuel efficiency.

Disadvantages

It possesses a health risk to most children and can even lead to asthma. Carbon monoxide is formed by the combustion of fuels such as gasoline. It is both colourless and odourless gas. When carbon monoxide is inhaled, it can block the transport of oxygen to the brain, heart, and other important organs in the body.

- Air Pollution: Transportation is a major contributor to air pollution. ...

- Noise Pollution: Transportation traffic is a significant contributor to pollution. ...
- Congestion: Traffic congestion is a common problem in cities and densely populated areas.

engines mean more fuel usage and not such great mileage either. You might end up spending huge money on gas each month. Given how crowded our cities are these days, a big car may not be the best choice of ride. It takes up too much space and parking spots are hard to come by too

Noun **She had the disadvantage of growing up in a poor community.** They argued that the new regulations would place their company at a competitive disadvantage in the marketplace. There are advantages and disadvantages to the new system.

APPLICATIONS:

- Objective of Vehicle Management System
- Scope of Vehicle Management System
- Software Requirement Specification (SRS) of Vehicle Management System
- Hardware Requirements of Vehicle Management System
- Testing Strategy of Vehicle Management System
- All modules and description of Vehicle Management System
- All Screenshot of Vehicle Management System
- Coding of Vehicle Management System
- Dataflow Diagram (DFD) Zero Level DFD, 1st Level DFD, 2nd Level DFD of Vehicle Management System
- Entity Relationship (ER) Diagram of Vehicle Management System
- Feasibility Study of Vehicle Management System
- Software Requirements of Vehicle Management System
- Conclusion of Vehicle Management System
- Future scope of Vehicle Management System

FUTURE SCOPE :

Software Requirements of Vehicle Management System; Conclusion of Vehicle Management System; Future scope of Vehicle Management System. Vehicle Management

To assist in the tracking of vehicles operation and the planning maintenance (i.e.: replacement of

Benefits

What are the benefits of using Intoweb's Vehicle Management Software?

- You can purchase the Vehicle Management Software as a standalone version - you don't have to buy the entire Human Resource System.
- The Vehicle Management Software runs online, which allows you to access any information from anywhere in the world at any given time, as long as you have Internet access.
- The Vehicle Management Software is fully customizable to suit the needs of your business.
- The Vehicle Management Software integrates with other systems such as other Human Resource Software solutions and the Payroll Software. When combining a competent web based Vehicle Management Software with other systems you ensure that your company has a dynamic process integrated with the daily management operations you can even integrate with third party systems available to the fleet manager, in order to automate the processes. These systems include vehicle tracking systems, computerised clocking systems, on-board load cells and general driving technique information systems.
- Reliable Vehicle Management Software includes well defined written policies and formal processes in the vehicle operating environment.

Features

Vehicle Management Software General Features
